

First meeting: *several minutes before* the meeting you will have to download an application. Follow the different steps below.

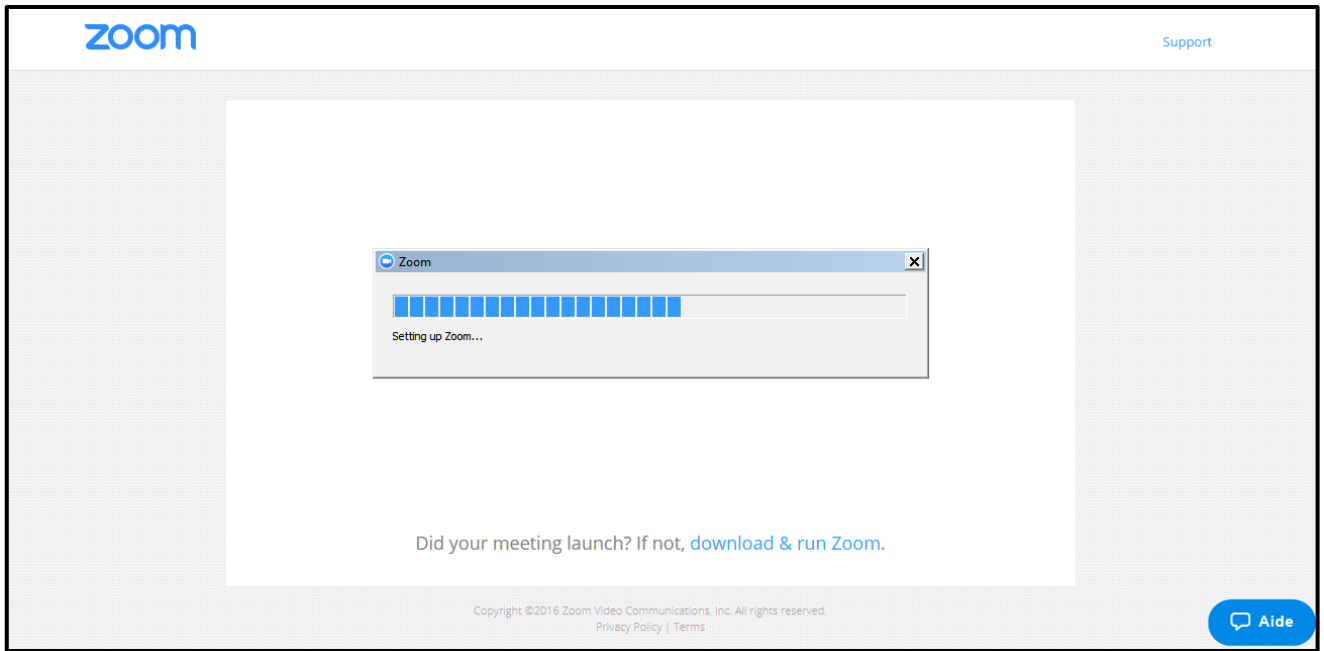

- 1st step: Click on the link to join the conversation then you will go directly on a page
- 2nd step: Click on Launch Zoom as it appears below.

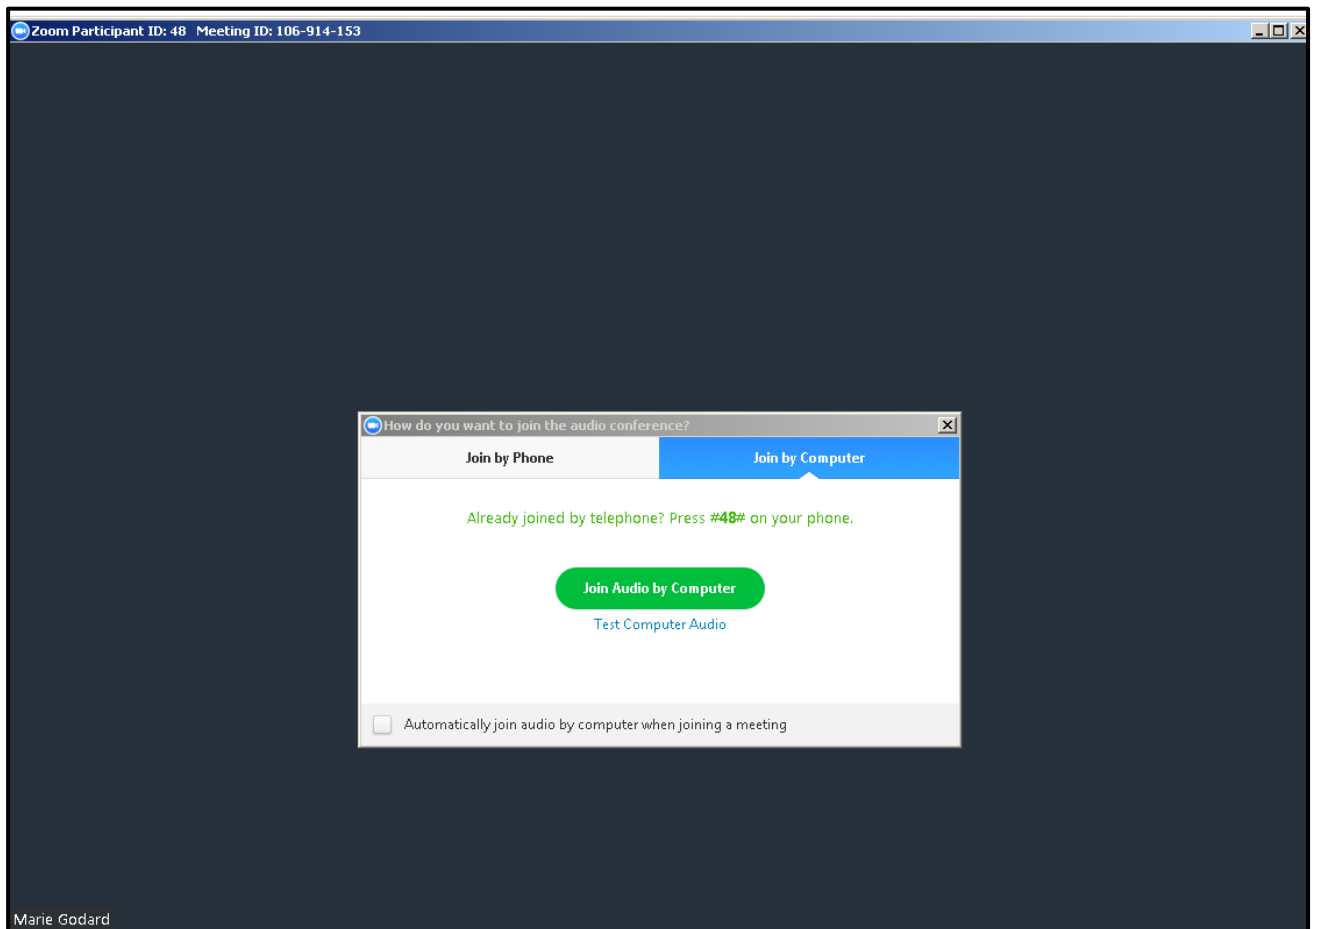

- 3rd step: A file will be downloaded which can be called: “zoominstaller.pkg”/”Zoom_launcher.exe”, depending on your kind of computers (*See below*). With some kind of computers the downloading **can be really slow** so get ready **several minutes before the meeting starts**.

- **4th step:** Double click on the download application. After this, a window will appear with “Zoom installer is processing” or “Initialize”. (See below) With Mac → double click on the download application and then it opens directly.

- **5th step:** Enter your name (When it is the first time you use the application only)
- **6th step:** Press join and specify “Join Audio by computer” (See below)
- **7th step:** You are connected!

See you there! Thank you,
The OLAGE Team
